

● AGRI PALLET BOXES AND COVERS

PRODUCT INFORMATION

Vegetables and potatoes are cultivated with care. Which is why they also deserve the best possible processing. This means the maximum protection, the most efficient transport and an attractive presentation in the shop. To ensure your product is well packed and safely transported Van der Windt offers a full range of pallet boxes and, if required, matching covers. Whether it's a box full of loose cabbages, bulk packs of radishes or carrots, or outer packaging for small packs of potatoes, Van der Windt pallet boxes ensure a very inexpensive (only one box per pallet) and very stable packaging for your medium and long distance transport. Filling and emptying the pallet boxes is easy and efficient because they incorporate a filling flap. To ensure the optimum ventilation, depending on the type of potato, vegetable or fruit product, the boxes are supplied with air holes. And to give your load extra stability the boxes can be reinforced with Polypropylene (PP) strapping tape. The pallet boxes and covers can, of course, be printed with your company name and/or logo. Retailers find pallet boxes a perfect display

packaging. Van der Windt - your pallet box supply partner.
