

## ● AGRI NET SACKS

### PRODUCT INFORMATION

Van der Windt offers a wide range of net sacks for the export of potatoes and onions in particular, but also for other crops such as leeks, Brussels sprouts, cabbage, and not to forget flower bulbs and firewood. Depending on the characteristics of the product to be packed we can supply knitted (raschel) sacks or woven (leno woven) sacks. In many colours, different qualities and meshes. On the roll or as loose sacks. With or without drawstring, labels, continuous or positioned printing. For manual or machine processing. Van der Windt is your network for net packaging.
