

● AGRI CONICAL SLEEVES AND SPECIALLY SHAPED BAGS

PRODUCT INFORMATION

Growers and packers in the glasshouse and agriculture sector deliver fresh, tasty products to supermarkets at home and abroad on a daily basis. Lettuce, leeks, Chinese cabbage, radishes, paksoi and peppers are just a few of the rich pallet of quality products grown and packed in the Netherlands. When you are looking for a special packaging for your vegetables and herbs Van der Windt is your partner: we develop, very often in collaboration with our associated manufacturing companies, packaging and packaging concepts that ensure the optimal protection, shelf-life and presentation of fresh produce. Van der Windt supplies a broad range of conical sleeves and specially shaped bags for manual and machine processing. The packaging is printed to your specifications and, if requested, our in-house studio will be happy to develop a suitable design. A conical bag for radishes, a sleeve for Lolla Rossa, a special bag for butterhead or iceberg lettuce, a sleeve for Ramiro peppers, a blocked bag for bunches of carrots or a self-standing bag for cherry tomatoes: Van der Windt has innovative solutions for all your packaging needs.
