

● AGRI PROTECTIVE MATERIALS & INTERIORS

PRODUCT INFORMATION

Van der Windt has a broad range of protective materials for in, on or around the box or crate. For instance, there are tray top covers for various types of EPS crates and boxes. There are fruit nests sheets with pre-formed cups, which give the carefully harvested products 'their own place' in the box or crate. We also have paper sheets, foam sheets and corrugated paper in many types and sizes, which protect fruit and vegetables against external influences.

For an optimum presentation of your product you can have the protective materials printed. Presenting your quality product in a recognisable manner, even in standard packaging. It's all possible with these materials.
